FOREWORD

We regret that, owing to the paper shortage, this Memoir has had to be restricted to a list of published contributions, and that we have not been able to include in it the summaries of contributions, and other information, which were features of previous Memoirs.

Papers of which reprints are procurable are indicated by numbers in the left-hand margin.

We are sorry to say that, on account of the paper shortage again, only a limited number of these reprints is available and that therefore we are unable to distribute them as widely as as was possible in the past.

The Librarian wishes to thank all who have kindly sent literature during the past two years.

Correspondence relating to the Memoirs and Publications sent in exchange should be addressed to :
